

Reading for Pleasure

Read or tell your favourite story to your class.

Alternatively have a session where you all read a book for pleasure.

Focus on Well Being

Spend some time focusing on mental health and well being. What is it? What resources are out there that can help us manage our lives most effectively?

You could end the session by going for a walk, guiding a meditation session, teaching some breathing exercises or playing some sport.

The Wonder of Maths!

- Spend time problem solving collaboratively. The Nrich website has some great ideas - <http://nrich.maths.org/frontpage>
- Explore ratio through painting and colour mixing.
 - Explore digital roots through art - <http://www.teachingideas.co.uk/maths/nopdigital2.htm>
- Imagine a world without right angles. Share your ideas and create your design.
 - Explore maths through music.

New Skills

Spend time enjoying a new skill. You could run a workshop teaching your students to plant vegetables, knit, bake, make books, marbled paper or sand wood. Or anything else that you fancy!

You Can't Test This

Art

Explore an artist and their work. Spend time discussing personal responses and ideas. Then enjoy creating some art of your own.

Enjoy your own poetry show!

Give your students a selection of poems and time to prepare a performance.

Some great poetry ideas and poems can be found at <http://www.poetryarchive.org/> <http://www.michaelrosen.co.uk/> <http://www.bbc.co.uk/schools/teachers/offbyheart/poetry.shtml>

Play Games!

Spend some time learning to play games together. Student could bring in their favourites to share.

Explore the Local Area

Plan a walk around Camden or wider London. You could theme the walk or simply spend some time walking, looking and talking.

Music

Choose a piece of music and listen to it. Talk about it, make connections and be inspired.

Mixed groups

Mix up your classes and give children a chance to spend time with children of other ages.
